ESCAPAMENTOS E CATALISADORES

SOLUÇÕES EM AÇO PARA OS MAIS EXIGENTES MERCADOS.

Provedora de soluções inovadoras e competitivas em aço, a Tuper se tornou referência pela alta qualidade de seus produtos e pela eficiência no atendimento aos clientes.

Com mais de 40 anos de atuação no mercado do aço, a empresa possui um dos mais avançados conjuntos tecnológicos para a fabricação de escapamentos e catalisadores da América Latina. Suas unidades industriais reúnem alta tecnologia, processos atualizados e profissionais altamente qualificados.

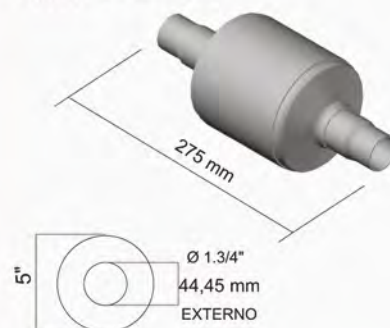

CATALISADORES UNIVERSAIS

DÚVIDAS NA ADAPTAÇÃO?

NÃO PERCA TEMPO
E AUMENTE AS VENDAS!

PASSO A PASSO PARA ADAPTAÇÃO DE UM CATALISADOR UNIVERSAL

1 Identificar o modelo de catalisador conforme aplicações e medidas sugeridas neste catálogo.

2 Colocar o catalisador novo na posição da peça a ser substituída e marcar a posição de corte dos tubos.

3 Cortar conforme marcação.

4 Posicionar o catalisador novo, pontear e soldar (Mig, tig ou solda maçarico).

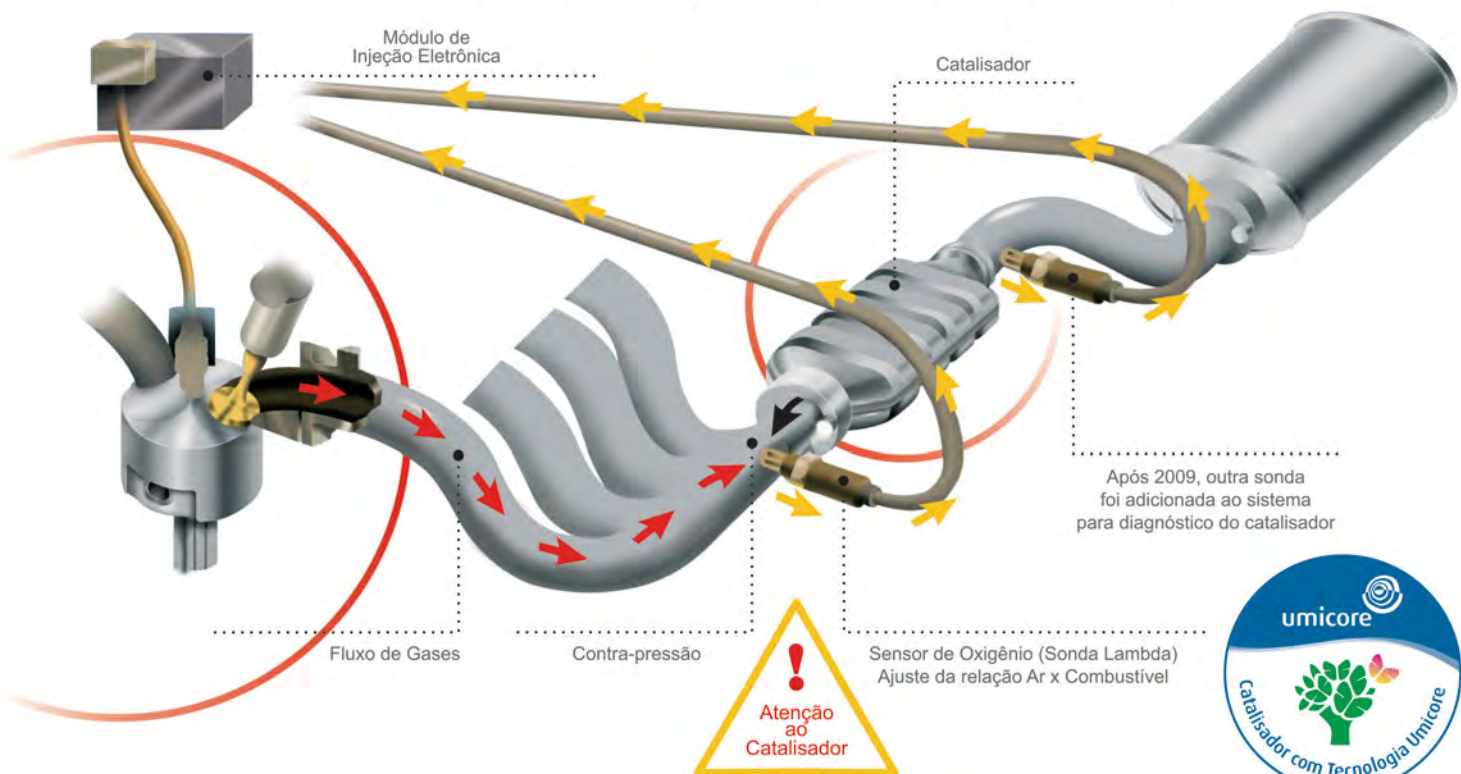

5 Acione o motor do veículo por no mínimo 15 minutos para que haja a expansão da manta de fixação do monolito no interior do catalisador. Verifique também se não está ocorrendo vazamento nas uniões dos componentes.

Obs.: A instalação do produto DEVE ser efetuada por funcionário capacitado e treinado na operação.

* imagens meramente ilustrativas.

Catalisador: consumo e potência do motor.

Sistema de escapamento com catalisador.

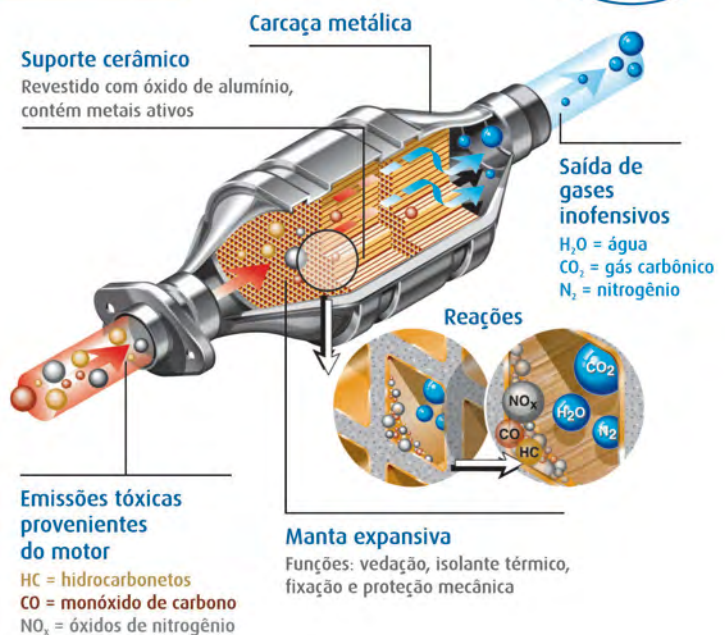

O catalisador é um dos responsáveis diretos pelo bom funcionamento do motor.

Isso significa que retirá-lo ou mesmo usar um catalisador de má procedência tira a potência do motor além de aumentar o consumo de combustível.
